The Pacific Forestry Centre, Victoria, British Columbia

The Pacific Forestry Centre of the Canadian Forest Service undertakes research as part of a national network system responding to the needs of various forest resource managers. The results of this research are distributed in the form of scientific and technical reports and other publications.

Additional information on Natural Resources Canada, the Canadian Forest Service, and Pacific Forestry Centre research and publications is also available on the World Wide Web at **http://www.pfc.cfs.nrcan.gc.ca/.**

Contents

Climate change and environmental influences 1
Economics and statistics 1
Forest ecology and site classification 1
Forest fires 2
General information 3
Genetics, tree improvement, and biodiversity 6
Growth and yield, inventory and monitoring 7
Impacts of forestry practices 8
Insects and diseases 9
Silviculture 14
Order form 17

Science and Technology Networks

The Canadian Forest Service has adopted a network-based approach to deliver its entire science and technology program. This network-based approach enables the Canadian Forest Service to address national and international issues while delivering programs through regional research centres. The networks cover ten main areas of sustainable forest management, and are formed around strategic policy issues and associated research priorities at the regional, national, and international levels, according to the mandate, resources, facilities, and expertise of the Canadian Forest Service.

Each network is led by one of five research establishments of the Canadian Forest Service. (Contact information for these establishments and for the headquarters of the Canadian Forest Service is given on the back cover of this catalog.) The Pacific Forestry Centre provides scientific and technical leadership for two of the ten networks - the Effects of Forestry Practices and Landscape Management networks, but it also contributes critical research to the eight other national networks. The other networks are led by the other establishments in Edmonton, Alberta; Sault Ste. Marie, Ontario; Sainte Foy, Quebec; and Frederiction, New Brunswick.

In many cases, the scientific and technical publications listed in this catalog are specifically related to one or more of the CFS networks. Where this is the case, the network or networks concerned are indicated by abbreviations in the right margin of the page.

The names of the networks and the abbreviations used in this catalog are:

FM	Fire Management
PMM	Pest Management Methods
FEP	Forest Ecosystem Processes
LM	Landscape Management
FH	Forest Health
FB	Forest Biodiversity
SER	Socio-economic Research
CC	Climate Change
EFP	Effects of Forestry Practices
TBAG	Tree Bitechnology and Advanced Genetics

The Pacific Forestry Centre On-line Bookstore

Do you need the latest in forestry research?
Do you need it quickly?

- Search our on-line catalog of thousands of forestry publications (Search by title, by date, by subject category, or simply ask to see our latest publications.)
- Read on-line summaries of research reports
- Order publications quickly and easily using a virtual "shopping cart"

Many of our recent reports are available to download in Acrobat® format, so you can often get the report you need within minutes. Our catalog is updated every few days, so be sure to bookmark the Pacific Forestry Centre bookstore and visit us regularly.
